AZSA 38th Annual Barrow Neuroscience Nursing Symposium Day 1

Event · Dignity Health Internal · 8 hours

As the care of neuroscience patient evolves, it becomes increasingly challenging for clinicians to incorporate state of the art care for our patients. This course will provide an organized approach to the detailed planning and interventions that take place, surrounding the complex care of the patients that present with neurological disorders of the brain and spine. Participants will learn from experts in the fields of stroke care, parkinson's, epilepsy, neurosurgery, critical care and speech pathology. In addition, there will be special presentations on the patient and family. The goal is to share the most innovative and evidence based clinical practices to optimize patient outcomes through all areas of neuroscience.
