MULTIPLE SCLEROSIS EMPOWERMENT SUMMIT

Who Should Attend

This program has been designed to meet the needs of patients who are being treated for multiple sclerosis. Patients in attendance will receive resources on the latest medications, trials, therapies, community engagement and other resources available to them here at Barrow. The patients will also be able to ask questions and continue building their support network throughout the program.

Objectives

- Explain current disease-modifying therapies available for multiple sclerosis
- Define the current available clinical trials at Barrow
- Explain the importance of physical therapy, occupational therapy, and speech therapy in maintaining functional status in your everyday life
- Convey resources for caregivers and patients from a social work perspective
- Define community engagement opportunities available at Barrow

March 9, 2024

8:30 a.m. - 4 p.m.

Creighton University

3110 N. Central Ave., Suite D 200, Phoenix, AZ 85012
