

Petznick Stroke Center

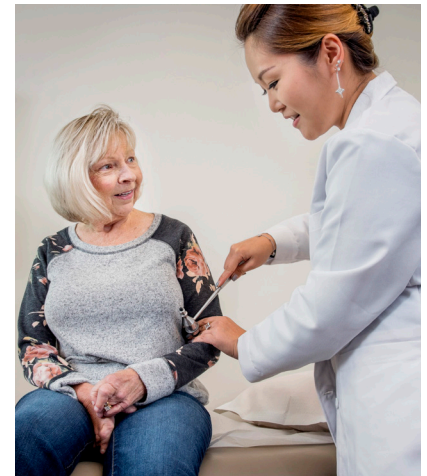

At the Petznick Stroke Center, we are committed to providing excellent care, informing the community about prevention through control of risk factors, and finding new ways of treating and preventing stroke through research.

Barrow Neurological Institute at Dignity Health St. Joseph's Hospital and Medical Center has one of the most experienced and expert stroke programs in the country, caring for more stroke victims than any other center in the southwestern United States. The Petznick Stroke Center is nationally certified by The Joint Commission and holds a Primary Stroke Center certification, which recognizes hospitals with state-of-the-art infrastructure, experienced staff with unique education, and competency standards to receive and treat patients with strokes. The Center's primary certification is a testament to the ability of Barrow to meet stroke center standards and requirements, including advanced imaging capabilities, vascular imaging, and 24/7 availability of specialized treatment.

The Barrow Difference

- The Petznick Stroke Center is a **Stroke Center of Excellence**, with accolades including a **2020 Get With the Guidelines® Stroke Gold Plus Quality Achievement Award** and an **American Heart Association/American Stroke Association Target Stroke Honor Role Elite Plus Award**.
- Stroke patients at Barrow are cared for by an interdisciplinary team of clinical experts including our American Board of Psychiatry and Neurology, Inc., Vascular Neurology-certified physicians, cerebrovascular and endovascular neurosurgeons, nurses, rehabilitation therapists, and care coordinators. Interdisciplinary care allow us to meet the unique needs of every patient.
- Barrow offers comprehensive care for stroke patients, including both inpatient and outpatient services, featuring treatments available across the continuum of stroke care – from the pre-hospital setting to integration back to life at home.
