

At the Petznick Stroke Center at Barrow Neurological Institute, we are committed to providing the complete spectrum of stroke care, informing the community about stroke prevention, and finding new ways of treating and preventing strokes through research.

This commitment has earned us national recognition as a Joint Commission-certified Comprehensive Stroke Center, which is the highest level of certification a hospital can receive for the care of complex stroke patients. Offered in collaboration with the American Stroke Association, this designation also recognizes our ability to provide patients with 24/7 access to advanced imaging and specialized care.

We're proud to care for more stroke victims than any other center in the Southwestern United States, while maintaining adherence to national stroke quality measures and standards of care.

The Barrow Difference

- The Petznick Stroke Center is a Joint Commission-certified Comprehensive Stroke Center, with additional accolades including a **2021 Get With the Guidelines® Stroke Gold Plus Quality Achievement Award** and **Target: Stroke Honor Roll Award** from the American Heart Association/American Stroke Association.
- Stroke patients at Barrow are cared for by an interdisciplinary team of clinical experts including:
 - Board-certified and fellowship-trained vascular neurologists
 - Board-certified and fellowship-trained endovascular and cerebrovascular neurosurgeons
 - Certified neuroscience and stroke nurses
 - Neuro-rehabilitation physicians and therapists
 - Neuro-critical care experts
 - Care coordinators
- Barrow offers comprehensive care for stroke patients, including both inpatient and outpatient services. We provide treatments across the continuum of stroke care—from the pre-hospital setting to reintegration into the community.

By The Numbers

- 64-Bed Neuro-Intensive Care Unit
- 24/7 Interventional Radiology and Neurovascular Surgery
- 32-Bed Neuro/Telemetry Unit
- 38-Bed Neuro Acute Unit
- 46-Bed Inpatient Neuro Rehabilitation
- 24/7 Mobile Emergency Stroke Treatment Unit

We are committed to providing the complete spectrum of stroke care, informing the community about stroke prevention, and finding new ways of treating and preventing strokes through research.
